The Scottish Prison Service strive to the challenge of supplying the highest quality of timber possible whilst remaining conscious of our environmental responsibilities. We are committed to producing our product range with timber from well managed and sustainable forests.

Timber is a natural product and will be subject to movement and weathering as it seasons. It is not uncommon for small splits and shakes to occur in timber when drying, or warping when timber is allowed to dry too rapidly. These would normally go back when humidity rises. This is nature at work and should not be considered a fault.

We have a reputation for producing quality garden furniture products and are fully committed to ensuring customer satisfaction.

The Forrest range of products have been designed to complement each other and attention has been paid to the detail of the product to ensure quality and durability.
