

Made from the highest quality oak, this comprehensive range will appeal to those looking for contemporary styling that makes a bold statement. Chunky in design, whatever piece of furniture you choose from this range, it is sure to invite comment. All main visible surfaces are made from thick & completely solid oak and are meant to endure modern family life. The ends of all the surfaces feature an appealing curve rather than sharp corners, whilst all the drawers come in a choice of handles. The dining tables come with 2 optional extension leaves - a must for entertaining, or large families, while chair seats can be upholstered in a variety of leathers, fabrics or left in plain wood. The range comes finished in natural linseed oil, but can be ordered in a variety of stained colours and finished with lacquer or just bleached (natural light oil).

Small coffee table
 L1000 x W600 x H500 mm

Features of natural wood

This range is handmade predominantly from kiln dried solid oak, from managed European forests. Some panels are oak veneer for structural integrity and stability.

The furniture is finished with natural Danish oil to enhance the natural colour and highlight the beautiful features of oak, such as grain, knots, shading and medullary rays. The natural variations in grain and wood colour ensure every piece is different and unique.

Wood is a beautiful natural material. It is important to understand its unique properties; these properties should not be mistaken for flaws.

Wood Shading and Grain

Each piece will have a slightly different grain pattern. Variation in colour, shading and grain between different products and within the same product can occur; this is a normal feature of all natural wood furniture.

Knots

Knots are a natural property of all real wood furniture; they do not affect performance, and add interest to each piece.

Medullary Rays

These markings are created where wood is cut across the grain producing interesting features such as growth rings and flecks.

Expansion

All timber will display movement from season to season because of changes in atmospheric temperature and humidity.

With careful use these finely produced pieces will give many years of satisfaction.
